

The Cure for Everything

The Lawson Digi-Star Dryer is an energy-efficient convection-air combo dryer that utilizes state-of-the-art curing technology and is specifically designed to cure digital, water-based and plastisol inks. A "universal live-air" dryer, the Digi-Star will even cure solvent-based inks. The Digi-Star combines color-blind infrared with a blanket of recirculating jet-air. Its compact design allows for maximum production in a small amount of space. Because the Digi-Star is so energy efficient, the warm-up time is only 10 minutes.

The Digi-Star is ideally suited for curing digital inkjet DTG prints for the textile industry. It may also be used with plastisol, water-based and all direct-to-garment inks. The Digi-Star is great for production applications where space is at a premium and true convection air is beneficial.

As with all Lawson equipment, the Digi-Star is part of Lawson's unique Trade-In, Trade-Up program, so you never have to worry about out-growing your dryer. This unit will provide the professional results your customers demand for properly cured DTG garments, and all types of plastisol and water-based inks.

ST. LOUIS | ATLANTA | NATIONWIDE

STANDARD FEATURES

- Floor Model Design
- 24", 36", 48" & 60" Belt Width
- 8' and 10' Long Heat Chamber (depending on size/model)
- 12' or 16' Overall Length
- Digital Temperature Control
- Digital Belt Speed Control
- 2' In-Feed
- 2' Out-Feed
- Adjustable Curing Control
- I.R. Combo with Jet-Air
- Recirculating Live Jet-Air
- Vacuumized Belt
- Powered Exhaust
- Double-Insulated Heat/Air Chamber
- "Cool-Touch" Outside
- Direct Drive Conveyor
- Easy Belt Tracking w/ Arrow Belt™
- Heat-Reflective, Memory Belt
- Reflective Infrared Booster
- Portable, Easy-to-Use
- 120/230 Volts; 1-Phase or 3-Phase (depending on size)
- National Safety Code Certified/ETL
- 5-3-1 Lawson Premium Parts Warranty

OPTIONAL FEATURES

- Custom Belt Widths
- Custom Belt Lengths (In-Feed & Out-Feed)
- Custom Heat Chamber Lengths
- Cap Side-Mounted I.R. panel (6" x 24")
- Phase Change (1 to 3; or 3 to 1)
- Export Electrics
- Crating

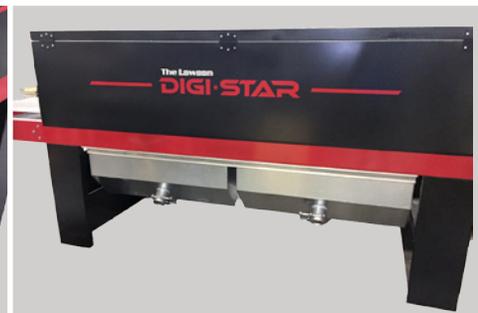

Adjustable Control Panel

Dual Exhaust Fans

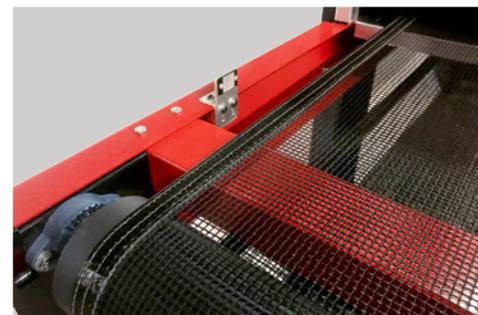

Panel ID with Lens Traps

Exhaust Pipes w/ Adjustable Exhaust Gates

LAWSON'S DIGI-STAR PROVIDES

- ✓ Cures Inkjet/DTG, Plastisol or Industrial Water-based Inks
- ✓ Extremely Energy Efficient
- ✓ I.R. + Convection Air
- ✓ Compact Design
- ✓ "Smoke-Free" Design
- ✓ Powered Exhaust System
- ✓ Lawson's exclusive "Cool Touch" Design & Insulation Package
- ✓ Easy-View, Adjustable Control Panel
- ✓ Digital Temperature & Belt-Speed Controls

Arrow Belt For Perfect Tracking
