

SEFAR® BASIC

Woven with yarn that maintains Sefar quality standards, this market specific mesh upholds the requirements sought after by the T-shirt industry. The SEFAR® BASIC product line encompasses the mesh specifications most commonly used by textile printers (83 to 305 threads per inch with varying thread diameters),

and is available in both yellow and white (depending on the mesh specification).

- Sefar will not cut down standard rolls.
- SEFAR® BASIC is not to be sold in place of, or against, SEFAR® PET 1000/1500 existing business.

- SEFAR® BASIC is not a service-supported product and cannot be returned for evaluation.
- All SEFAR® BASIC specifications may not be available for immediate delivery.

Puff ink applications on garments

High color density on ceramics

Structured and highly resistant floor tiles
