

LINEAR WALL WASHERS & GRAZERS

Slimray Outdoor LED Linear Fixtures

Slimray LED Linear fixtures are a new and revolutionary type of fixtures that provides an even and crisp light.

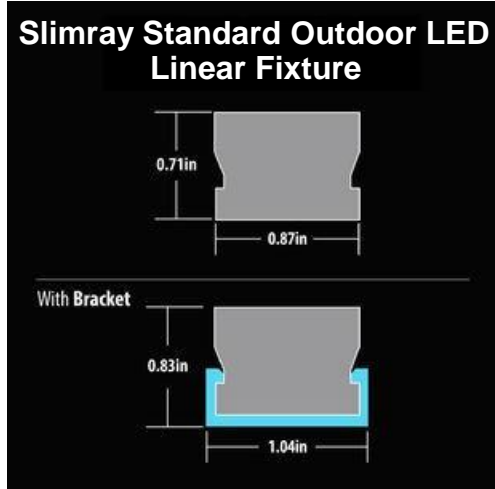

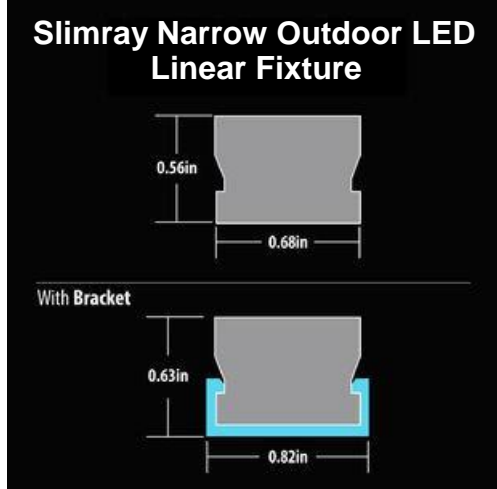

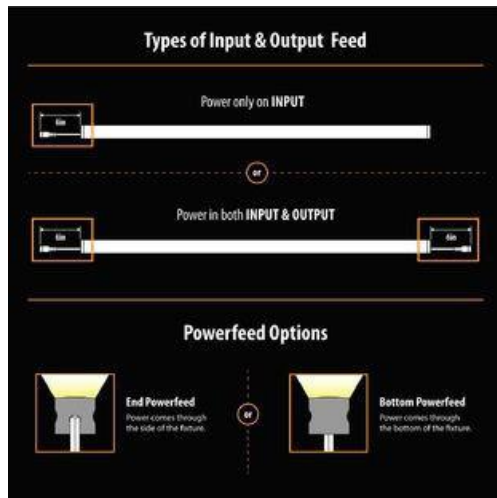

They are water resistant IP65 and can be used Indoors and Outdoors.

They are manufactured by infusing a thick 3 sided diffuser to the fixtures body done through injection molding systems. This create a 3 sided viewing angle with clean, even, and crisp lines of lights. Thanks to the fusion between body and the diffusing material, you can expect the same look as Square neon.

Slimray Fixtures offer an unsurpassed style and elegance, while providing accent lighting to any hi end project. They are manufactured to order and are available in any size between 6 and 78 inches.

Slimray fixtures are fully dimmable and are available in a multitude of color temperatures and colors. Each unit can have power leads at one side of the fixture or in both sides, so multiple units can be connected seamlessly. You can also choose to have the power cables coming through the side of the fixture or the bottom of the fixture. This is interesting when you want to have no cables visible coming out of the LED fixture when being installed in a surface. Mounting Brackets are included with each order. Longer units get more brackets in order to hold the unit effectively.

- ◆ Narrow 0.68in (H) x 0.56in (W)
- ◆ Standard 0.71in (H) x 0.87in (W)
