NEW Stellar White Ink Series

Eclipse Low Bleed White

Lunar Cotton White

Cosmic Poly White

Mercury Low Bleed White

Lunar Cotton White PADE1040 an easy printing high opacity white with excellent coverage and mat down on dark garments. The low tack formula allows printing through finer mesh counts without the need for a viscosity modifier. Use as an underlay where good opacity is needed, a stand-alone white or as a highlight white.

✓ High opacity ✓ Great mat down

Eclipse Low Bleed White PLHE1060 is a high opacity, low tack formulation which allows printing through finer mesh counts without the need for a viscosity modifier. PLHE1060 has good low bleed characteristics for printing on poly/cotton blends. Use as an underlay where great opacity is needed, a stand-alone white or as a highlight white.

✓ High opacity ✓ Great mat down

Mercury Low Bleed White PLHE1050 is designed for maximum smoothness and opacity on poly/cotton fabrics. Mercury LB White has excellent matting characteristics and a creamy consistency. PLHE1050 is fast flashing allowing for shorter dwell times and faster production rates. This low bleed white ink is great for both manual and automatic presses. Use as a highlight, a stand-alone or underlay white.

✓ High opacity ✓ Excellent mat down

Cosmic Poly White ATHP1060 is a good low temperature white with great opacity and when combined with Cosmic Barrier Grey (ATHP1550), has the best low temperature dye migration resistance on all 100% polyester performance fabrics in the market today. These distinctive low temperature cure inks have amazing stretch and recovery giving the prints a soft supple hand.

✓ Low Cure Temp ✓ Bleed Resistant ✓ Super Stretch
